

Heavy Equipment Mechanic JOB POSTING

Rice Commercial Group provides a cost effective, efficient, courteous and safe trucking service to the infrastructure and servicing industry. Rice Group's fleet consists of late model tri-axles, live bottom trailers, roll-off trucks and off road rock trucks available by contract or hourly rates. Float services are also available from 5 to 60 ton for most pieces of equipment.

Rice Aggregates Limited is a supplier of quality aggregates to the industry, including aggregates supplied by the largest producers and products made to exacting standards by **Rice Commercial Group** forces.

Rice Construction Limited is an experienced construction provider in all areas of the industry. Rice Group completes building construction on Rice Group projects only, and often uses third party contractors to complete building work. RICE Group completes with its own forces: sites preparation, excavation, grading and demolition, site servicing and site finishing.

Job Description:

We are looking for a Heavy Equipment or Truck & Coach Service Technician who can handle a variety of assignments for local aggregate hauling and construction.

This role performs all duties and tasks related to the preventative and corrective maintenance (mechanical, electrical & hydraulic) of transport/dump trucks & trailers; heavy equipment and other related construction equipment and vehicles.

The successful candidate must be able to work from blueprints, service manuals and schematic drawings, conduct inspections and tests and repair and replace parts in remote locations outdoors in all types of weather conditions. Use of cutting torches and welder to perform various fabrication tasks, comfortable using both stick and mig welding applications.

This role works both in the shop and out in the field; must be able to work in all weather conditions and work well in both independently and a team environment

Prepare and submit equipment maintenance records, time sheets, etc.

Has the utmost respect for safety procedures including the use of safety clothing and equipment and ensures any concerns are reported.

Ensures cleanliness and organization of shop, maintenance of shop tools and equipment, loading/unloading and storage of equipment, etc.

Skills Required:

- We require a good safety record and the highest degree of dependability.
- Able to work long days, flexible work hours & weekends
- 3+ years of experience as a Licensed Heavy Equipment Mechanic (421A) or Truck & Coach Mechanic (310T).
- A year 2 or above apprentice working towards 421A or 310T licence will also be considered
- 3+ years of experience with repairing and maintaining Heavy Equipment
- Valid driver's license with clean driver's abstract
- Air Brake Endorsement required
- Must have own tools applicable to position
- Must be able to perform the physical requirements of the role (heavy lifting, bending, climbing, working at heights)
- Background in mechanical knowledge, particularly with various heavy duty engines and extensive knowledge of heavy equipment

Heavy Equipment Mechanic JOB POSTING

- Experienced with hydraulic and/or electrical work
- Strong problem solving skills
- Exhibits strong teamwork, verbal and written skills
- Ability to work safely in a fast pace environment
- Demonstrates superior time management skills
- Must speak fluent English

Job Type: Full-time

We appreciate all applicants received; however, only those selected for an interview will be contacted
